Digital Signal Processing for Wireless Communication using Matlab

E.S. Gopi

Digital Signal Processing for Wireless Communication using Matlab E.S. Gopi

This book examines signal processing techniques used in wireless communication illustrated by using the Matlab program. The author discusses these techniques as they relate to Doppler spread, Delay spread, Rayleigh and Rician channel modeling, rake receiver, diversity techniques, MIMO and OFDM based transmission techniques, and array signal processing. Related topics such as detection theory, Link budget, Multiple access techniques, spread spectrum, are also covered. • Illustrates signal processing techniques involved in wireless communication • Discusses multiple access techniques such as Frequency division multiple access, Time division multiple access, and Code division multiple access • Covers band pass modulation techniques such as Binary phase shift keying, Differential phase shift keying, Quadrature phase shift keying, Binary frequency shift keying, Minimum shift keying, and Gaussian minimum shift keying.

From reader reviews:

Jennifer Dillon:

People live in this new day of lifestyle always attempt to and must have the free time or they will get lots of stress from both day to day life and work. So , when we ask do people have free time, we will say absolutely without a doubt. People is human not just a robot. Then we question again, what kind of activity do you have when the spare time coming to an individual of course your answer can unlimited right. Then do you ever try this one, reading guides. It can be your alternative in spending your spare time, often the book you have read is Digital Signal Processing for Wireless Communication using Matlab.

Mary Richie:

Reading can called thoughts hangout, why? Because while you are reading a book mainly book entitled Digital Signal Processing for Wireless Communication using Matlab the mind will drift away trough every dimension, wandering in each aspect that maybe unidentified for but surely can be your mind friends. Imaging every word written in a book then become one application form conclusion and explanation that will maybe you never get prior to. The Digital Signal Processing for Wireless Communication using Matlab giving you one more experience more than blown away the mind but also giving you useful facts for your better life in this era. So now let us demonstrate the relaxing pattern this is your body and mind will probably be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary wasting spare time activity?

Eulalia Perry:

Are you kind of hectic person, only have 10 or 15 minute in your day time to upgrading your mind skill or thinking skill actually analytical thinking? Then you are experiencing problem with the book than can satisfy your short space of time to read it because this time you only find publication that need more time to be go through. Digital Signal Processing for Wireless Communication using Matlab can be your answer mainly because it can be read by you who have those short free time problems.

Mark Adair:

Some people said that they feel bored stiff when they reading a reserve. They are directly felt the idea when they get a half parts of the book. You can choose the book Digital Signal Processing for Wireless Communication using Matlab to make your reading is interesting. Your own skill of reading skill is developing when you including reading. Try to choose easy book to make you enjoy to study it and mingle the idea about book and looking at especially. It is to be initial opinion for you to like to open a book and study it. Beside that the reserve Digital Signal Processing for Wireless Communication using Matlab can to be your brand-new friend when you're experience alone and confuse in what must you're doing of these time.
