**The Smart Revolution Towards the Sustainable Digital Society: Beyond the Era of Convergence (Advances in Information, Communication and Entertainment Markets series)** Hitoshi Mitomo, Hidenori Fuke, Erik Bohlin

The objective of this book is to present a comprehensive evaluation of the smart revolution, including its social and economic impacts. It proposes a modern framework to help assess how recent information and communication technologies (ICTs) can contribute to societies as a whole.

The authors offer a guide to how advanced network technologies have led to a greater variety of applications and social networking services. These allow people to connect with each other both at a more personal and global level, and will ultimately herald a new era of ICTs that will shape the 'digital society'.

This essential resource will appeal to academics, government officials and practitioners in telecommunications and media.
