Project Management for Healthcare Informatics (Health Informatics)

Susan Houston, Lisa Anne Bove

Project Management for Healthcare Informatics (Health Informatics) Susan Houston, Lisa Anne Bove Nurses are constantly involved with projects; staff nurses develop plans of care, nurse managers determine projected staffing patterns, staff development instructors create courses, informatics nurses implement software applications. The project management process can be utilized to facilitate these and many other nursing projects. Project Management for Healthcare Informatics will provide an explanation of the project management process tailored for nurses through its use of real clinical examples. In the first chapters, the project management process will be described in detail along with its relationship to the phases of the project life cycle. The tools available to successfully complete each phase of the project management process and move along the project life cycle will be included. The rest of the book will be devoted to discussion on how to apply these principles in the day-to-day work of the nurse—whether manager, staff nurse, educator, researcher, or informatician. Case studies and project examples will comprise the majority of material in these chapters. Many books on project management exist, ranging from college text books to handbooks for the practicing project manager. No books, however, are specifically focused on project management for nurses. Project Management for Healthcare Informatics will fill this gap. This book will serve as a text for nurses who want to become knowledgeable in project management and/or as a reference to those nurses actually managing real world healthcare projects.

From reader reviews:

Anthony Youngblood:

Have you spare time for the day? What do you do when you have much more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a stroll, shopping, or went to the particular Mall. How about open or even read a book allowed Project Management for Healthcare Informatics (Health Informatics)? Maybe it is to become best activity for you. You already know beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with it is opinion or you have additional opinion?

Lela Hird:

What do you concerning book? It is not important along with you? Or just adding material if you want something to explain what the ones you have problem? How about your extra time? Or are you busy man? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everyone has many questions above. They need to answer that question mainly because just their can do in which. It said that about publication. Book is familiar on every person. Yes, it is proper. Because start from on guardería until university need this Project Management for Healthcare Informatics (Health Informatics) to read.

Bernice Cofield:

Is it an individual who having spare time then spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something new? This Project Management for Healthcare Informatics (Health Informatics) can be the reply, oh how comes? It's a book you know. You are consequently out of date, spending your time by reading in this brand new era is common not a geek activity. So what these books have than the others?

Lester Baker:

As a scholar exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some reserve, they are complained. Just tiny students that has reading's soul or real their passion. They just do what the educator want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that examining is not important, boring and also can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Project Management for Healthcare Informatics (Health Informatics) can make you experience more interested to read.
