The CAPRISA Clinical Trials: HIV Treatment and Prevention

The CAPRISA Clinical Trials: HIV Treatment and Prevention

Since its inception 14 years ago, CAPRISA has conducted numerous clinical studies that have influenced international TB-HIV treatment guidelines as well as HIV prevention through innovations in the microbicide and vaccine fields. This book provides a historical account of how each of CAPRISA's high impact studies was created, developed, implemented, analysed and communicated. In doing so, the reader is taken on a journey that provides glimpses into the genesis of research ideas and how this ultimately leads to a range of HIV prevention and treatment studies that have impacted the global response to the HIV and TB epidemics.

Comprised of 5 sections, the book details the following:

1. HIV epidemic in South Africa and the establishment of a research centre to undertake clinical, epidemiological and laboratory research on HIV.
2. CAPRISA's clinical trials on HIV and HSV-2 prevention. These studies investigated the impact of tenofovir gel as topical antiretroviral pre-exposure prophylaxis (PrEP), implementation of topical PrEP through family planning clinics, conditional cash incentives for HIV prevention, HIV vaccines, and passive immunisation with broadly neutralising antibodies.
3. CAPRISA's research on the treatment of HIV and TB co-infection.
4. A review of the major scientific findings from the CAPRISA studies on acute infection and genital mucosal immunology.
5. Essential support activities for the conduct of clinical trials, including research laboratories and pharmacies, as well as establishing effective communication and sustainable structures for community engagement to maintain effective and respectful partnerships with participating communities. The book concludes with a chapter about the challenges facing future HIV prevention and treatment trials.

The CAPRISA Clinical Trials: HIV Treatment and Prevention is a resource for undergraduate and postgraduate students, health care providers, doctors, decision-makers and researchers who are seeking guidance and insights on clinical trials – their creation, conduct and impact.

So , do you continue to thinking The CAPRISA Clinical Trials: HIV Treatment and Prevention is not loveable to be your top checklist reading book?

Mark Shanks:

Reading a book to be new life style in this yr; every people loves to read a book. When you examine a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your analysis, you can read education books, but if you want to entertain yourself look for a fiction books, these us novel, comics, and soon. The The CAPRISA Clinical Trials: HIV Treatment and Prevention will give you new experience in examining a book.

Zandra Woods:

As a scholar exactly feel bored to reading. If their teacher requested them to go to the library as well as to make summary for some reserve, they are complained. Just minor students that has reading's internal or real their interest. They just do what the professor want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that reading through is not important, boring along with can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this The CAPRISA Clinical Trials: HIV Treatment and Prevention can make you feel more interested to read.
