Parents want to be supportive of math education. But they often feel frustration when they don't recognize the kind of instruction their children are getting. The *Supporting School Mathematics* parent workshop series uses explicit, thorough, hands-on examples to illustrate how key aspects of your math curriculum work.

Each *Supporting School Mathematics* package includes everything you need to conduct a successful parent workshop:

- a planning handbook that offers general advice on presenting mathematical content and even provides you a Q-and-A section featuring the questions you are most likely to get and good answers to them
- a module that includes scripts, content-specific talking points, overheads, and handouts that help audience members understand how their children are learning and discover new ways of helping them at home
- a CD that contains ready-to-print files for the overheads as well as printable versions of the handouts

Gain parents' support by using *Supporting School Mathematics* to introduce them to high-quality, student-centered mathematics instruction. It's an easy, new way to change how they think about their children's math education.
