**The book college graduates *wish* they had when they were freshmen!**

Ok, you know you need a degree to get where you want to be in life. But these days, it's tougher than ever to succeed in college. Getting into a good school is hard enough, but that's only the beginning - you still have to fight to get into classes, compete for a spot in programs and majors, and figure out a whole new world of college policies and procedures...all that before you even crack open your first textbook!

Then you have to figure out how to *pay* for all of it. And with skyrocketing tuition and fees, most can only do it with huge student loans; the average graduate these days is buried in debt before they even start their first job. It's enough to make you wonder – is all this even worth it?

The fact is that, for way too many uninformed and underprepared students, it may not be. But with this book, *you won't be one of them*. In this book, you'll learn unconventional strategies to beat the college system, both in and out of the classroom, such as:

- How to cram for tests
- How to win over your TAs and professors
- How to appeal and negotiate your grades
- What college *really* costs...and how to cut that amount in half
- The truth about so-called “financial aid”
- Little-known programs and loopholes to look for
- And much more!

College is a more expensive, more competitive place than ever, and you're going to need a lot more than good grades to make it. What you need is a survival guide of unconventional hacks and strategies to give you a real competitive edge...and this is it!
