Gravitational Lenses: Proceedings of a Conference Held in Hamburg, Germany, 9-13 September 1991 (Lecture Notes in Physics)

One of the most spectacular predictions of Einstein's theory of general relativity is the occurrence of gravitational lenses in our galactic system. Nowadays the mastering of the mathematics together with the technology available to astronomers allow Einstein's prediction to be confirmed. Several reviews here give the reader the chance to understand the basic theoretical concept of gravitational lensing and to obtain an overview of observational work. The present state of the field and latest results are given in a large number of specialized papers. An extensive source and subject index make these proceedings valuable also as a reference book for all researchers active in the field.
