Modern International Developments in Trust Law David J. Hayton

This book is concerned with the development of the trust idea in common law jurisdictions, whether mainland or offshore, and in civil law jurisdictions. While trusts are important for preserving family wealth and influence, over ninety per cent of the value of trust funds is found in commercial or financial trusts, about which little has been written.

It is interest in the latter type of trust that is likely to lead to the development of the trust idea in European mainland jurisdictions, especially as the economic destinies of European jurisdictions become increasingly intertwined and as the Hague Convention on the Recognition of Trusts comes to be implemented.

the potential for the development of a core trust concept in civil law jurisdictions as a special part of the law of obligations, without any need to create equitable proprietary interests in favour of beneficiaries. **Modern International Developments in Trust Law** will be of interest not only to academic trust lawyers and comparative lawyers, but to common law and civil law practitioners, whether interested in taking advantage of foreign trust laws, or in developing in their local jurisdictions new ideas obtained from foreign jurisdictions.
