Elliot Blass, Vivian Ciaramitaro

A New Look at Some Old Mechanisms in Human Newborns: Taste and Tactile Determinants of State, Affect, and Action (Monographs of the Society for Research in Child Development) Elliot Blass, Vivian Ciaramitaro

A fundamental goal of biological research on ontogeny is to discover when and how developmental changes can be induced as well as the consequences, limits, and mechanisms underlying such changes. With their commitment to defining and understanding environmental influences on behavior, developmental psychology and psychobiology both share these goals. The present Monograph, which is concerned with how human mothers influence their infants through nursing, grows out of this research tradition.
