**Human Posture: The Nature of Inquiry (S U N Y Series in Science, Technology, and Society)** John A. Schumaker

Schumacher has written a provocative work in the philosophy of science. In presenting posture as the most important aspect of life, Schumacher examines how the terms of posture encompass all the major disciplines and provide a means for resolving human dilemmas through a humanistically oriented philosophy of inquiry. He investigates a variety of important philosophical topics: abstract thought, perception, time, space, sexuality, education, and community. Insights into the origins and measures of space and time are especially valuable.
