Respiratory Care Calculations

David W. Chang

Respiratory Care Calculations David W. Chang

This new edition covers all essential calculations used in the practice of respiratory care. The step-by-step approach should help any student complete the calculation with little difficulty. Each equation presented is accompanied by a description of the abbreviations, followed by an example of its calculation. Pertinent clinical notes are described at the end of each topic. Practice exercises are included to reinforce learning and retention. A review of basic math functions is included to provide a quick review of the interrelationship between variables in equation.
