## **Territories of Evil. (At the Interface / Probing the Boundaries)** Nancy Billias

Evil is not only an abstract concept to be analyzed intellectually, but a concrete reality that we all experience and wrestle with on an ongoing basis. To truly understand evil we must always approach it from both angles: the intellectual and the phenomenological. This same assertion resounds through each of the papers in this volume, in which an interdisciplinary and international group (including nurses, psychologists, philosophers, professors of literature, history, computer studies, and all sorts of social science) presented papers on cannibalism, the Holocaust, terrorism, physical and emotional abuse, virtual and actual violence, and depravity in a variety of media, from film to literature to anim  to the Internet. Conference participants discussed villains and victims, dictators and anti-heroes, from 921 AD to the present, and considered the future of evil from a number of theoretical perspectives. Personal encounters with evil were described and analyzed, from interviews with political leaders to the problems of locating and destroying land mines in previous war zones. The theme of responsibility and thinking for the future is very much at the heart of these papers: how to approach evil as a question to be explored, critiqued, interrogated, reflected upon, owned. The authors urge an attitude of openness to new interpretations, new perspectives, new understanding. This may not be a comfortable process; it may in fact be quite disturbing. But ultimately, it may be the only way forward towards a truly ethical response. The papers in this collection provide a wealth of food for thought on this most important question.
